# Author's declaration

Hereby I solemnly declare:

1. that this Masterthesis, titled *Simulating the GPU-based shaders in the graphics pipeline on a CPU-based language to allow code inspection at runtime* is entirely the product of my own scholarly work, unless otherwise indicated in the text or references, or acknowledged below;
2. I have indicated the thoughts adopted directly or indirectly from other sources at the appropriate places within the document;
3. this Masterthesis has not been submitted either in whole or part, for a degree at this or any other university or institution;
4. I have not published this Masterthesis in the past;
5. the printed version is equivalent to the submitted electronic one.

I am aware that a dishonest declaration will entail legal consequences.

Weingarten, September 2019

---

Matthias Mettenleiter

## **Abstract**

An abstract is a brief summary of a research article, thesis, review, conference proceeding or any in-depth analysis of a particular subject or discipline, and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript, acting as the point-of-entry for any given scientific paper or patent application. Abstracting and indexing services for various academic disciplines are aimed at compiling a body of literature for that particular subject.

The terms précis or synopsis are used in some publications to refer to the same thing that other publications might call an “abstract”. In “management” reports, an executive summary usually contains more information (and often more sensitive information) than the abstract does.

# 1 Introduction

Explanation of debugging

Problem with debugging of shaders in the graphics pipeline

Existing approach for compute shaders

Objective of creating a general solution for debugging shaders in the graphics pipeline

## 2 Related Work

Existing methods for debugging shaders in the graphics pipeline

Approaches for translating and simulating compute shaders

Compiled:	2015-04-10T18:40Z by jenkins from (detached from d4c8d4d)
Cluster ID:	CID-322169a1-9f18-4284-9cfa-490bd79c1dd4
Block Pool ID:	BP-1249407956-127.0.1.1-1436480592942

### Summary

Security is off.  
 Safemode is off.  
 1 files and directories, 0 blocks = 1 total filesystem object(s).  
 Heap Memory used 26.65 MB of 50.49 MB Heap Memory. Max Heap Memory is 966.69 MB.  
 Non Heap Memory used 30.99 MB of 32.25 MB Committed Non Heap Memory. Max Non Heap Memory is 214 MB.

Configured Capacity:	18.58 GB
DFS Used:	24 KB (0%)
Non DFS Used:	2.85 GB
DFS Remaining:	15.73 GB (84.67%)
Block Pool Used:	24 KB (0%)
DataNodes usages% (Min/Median/Max/stdDev):	0.00% / 0.00% / 0.00% / 0.00%
Live Nodes	1 (Decommissioned: 0)
Dead Nodes	0 (Decommissioned: 0)
Decommissioning Nodes	0
Total Datanode Volume Failures	0 (0 B)
Number of Under-Replicated Blocks	0
Number of Blocks Pending Deletion	0
Block Deletion Start Time	10.7.2015, 00:23:31

### NameNode Journal Status
